Index to Volume 182

Ahmad F, *see* Goldstein BJ *et al.*
Authier F, *see* Di Guglielmo GM *et al.*
Avruch J: Insulin signal transduction through protein kinase cascades 31–48

Baass PC, *see* Di Guglielmo GM *et al.*
Baudry A, *see* Lamothe B *et al.*
Begum N, *see* Ragolia L
Bergeron JJM, *see* Di Guglielmo *et al.*
Brady MJ, *see* Corley Mastick C *et al.*
Bucchini D, *see* Lamothe B *et al.*
Byon JCH, Kusari AB, Kusari J: Protein-tyrosine phosphatase-1B acts as a negative regulator of insulin signal transduction 101–108

Ceresa BP, Pessin JE: Insulin regulation of the Ras activation/inactivation cycle 23–29
Charron MJ, Katz EB: Metabolic and therapeutic lessons from genetic manipulation of GLUT4 143–152
Cordonnier N, *see* Lamothe B *et al.*
Corley Mastick C, Brady MJ, Printen JA, Ribon V, Saltiel AR: Spatial determinants of specificity in insulin action 65–71

Di Guglielmo GM, Drake PG, Baass PC, Authier F, Posner BI, Bergeron JJM: Insulin receptor internalization and signalling 59–63
Dohm GL, *see* Goldfine ID *et al.*
Drake PG, *see* Di Guglielmo GM *et al.*
Drake PG, Posner BI: Insulin receptor-associated protein tyrosine phosphatase(s): Role in insulin action 79–89
Duvillié B, *see* Lamothe B *et al.*

Fantus IG, Tsiani E: Multifunctional actions of vanadium compounds on insulin signaling pathways: Evidence for preferential enhancement of metabolic versus mitogenic effects 109–119
Feng Liu, Roth RA: Binding of SH2 containing proteins to the insulin receptor: A new way for modulating insulin signalling 73–78
Frittitta L, *see* Goldfine ID *et al.*

Goldfine ID, Maddux BA, Youngren JF, Frittitta L, Trischitta V, Dohm GL: Membrane glycoprotein PC-1 and insulin resistance 177–184
Goldstein BJ, Ahmad F, Wendi Ding, Pei-Ming Li, Wei-Ren Zhang: Regulation of the insulin signalling pathway by cellular protein-tyrosine phosphatases 91–99

Jami J, *see* Lamothe B *et al.*
Joshi RL, *see* Lamothe B *et al.*

Katz EB, *see* Charron MJ
Kasuga M, *see* Ogawa W *et al.*
Khandelwal RL, *see* Pugazhenthi S
Klip A, *see* Sweeney G
Krook A, *see* Zierath JR *et al.*
Kusari AB, *see* Byon JCH *et al.*
Kusari J, *see* Byon JCH *et al.*

Lamothe B, Duvillié B, Cordonnier N, Baudry A, Saint-Just S, Bucchini D, Jami J, Joshi RL: Genetic manipulation of insulin action and β-cell function in mice 161–168

Maddux BA, *see* Goldfine ID *et al.*
Matozaki T, *see* Ogawa W *et al.*

Ogawa W, Matozaki T, Kasuga M: Role of binding proteins to IRS-1 in insulin signalling 13–22

Pandey SK, *see* Srivastava AK
Pei-Ming Li, *see* Goldstein BJ *et al.*
Peraldi P, Spiegelman B: TNF-α and insulin resistance: Summary and future prospects 169–175
Pessin JE, *see* Ceresa BP
Posner BI, *see* Di Guglielmo GM *et al.*
Posner BI, *see* Drake PG
Printen JA, *see* Corley Mastick C *et al.*
Pugazhenthi S, Khandelwal RL: Insulin action on protein phosphatase-1 activation is enhanced by the antidiabetic agent pioglitazone in cultured diabetic hepatocytes 185–191

Ragolia L, Begum N: Protein phosphatase-1 and insulin action 49–58
Ribon V, *see* Corley Mastick C *et al.*
Roth RA, *see* Feng Liu

Saint-Just S, *see* Lamothe B *et al.*
Saltiel AR, *see* Corley Mastick C *et al.*
Spiegelman B, *see* Peraldi P
Srivastava AK, Pandey SK: Potential mechanism(s) involved in the regulation of glycogen synthesis by insulin 135–141
Sweeney G, Klip A: Regulation of the Na^+/K^+-ATPase by insulin: Why and how? 121–133

Trischitta V, *see* Goldfine ID *et al.*
Tsiani E, *see* Fantus IG

Wallberg-Henriksson H, *see* Zierath JR *et al.*
Wei-Ren Zhang, *see* Goldstein BJ *et al.*
Wendi Ding, *see* Goldstein BJ *et al.*
White MF: The IRS-signalling system: A network of docking proteins that mediate insulin action 3–11

Youngren JF, *see* Goldfine ID *et al.*

Zierath JR, Krook A, Wallberg-Henriksson H: Insulin action in skeletal muscle from patients with NIDDM 153–160
